Gut Balancer Trial 1

Effect of 7 days feeding on 29 horses with chronic loose droppings (2 x 20g/day)

Median Dropping Score

Liquid (0) V. Soft (1) Soft (2) Normal (3) Dry (4)

Non-Responders (n=5)
Fed 2 x 40g for a further 7 days
4/5 achieved normal droppings in 7 days on double dose

Gut Balancer

- Works rapidly to restore normal hindgut function
- Increases the energy obtained from fibre in the diet
- Maintains a normal hindgut pH
- For horses that are prone to colic or laminitis
- For horses that find it hard to gain or maintain weight
